
Individual Influence Level™ - Human Mechatronics®

Individual Influence Level™ - “Is it your mind thinking, or is it someone else’s”

The subject of Influence is one that there is no shortage of books, videos, psychologists, therapists, groups, medications, etc...to be gobbled up by us humans who want to be better than we are today. It would be amiss for me not to acknowledge and appreciate what others have done, and are still trying to do, in order to assist and help society and the human race, in achieving their desires. I also acknowledge that many people are far more educated and technically trained than I am. What I do offer here with the *Individual Influence Level™*, is a new perspective, with maybe even a deeper and more practical way of understanding what influence is, and how we are at times susceptible and at the mercy of our surroundings. Be it good or bad, positive or negative — we are influenced. The “Level” in Individual Influence Level™ means it is also somewhat measurable as you will see in future posts.

Individual Influence Level™ is the 3rd and pivotal Eye within this new science of Human Mechatronics™. Pivotal in that the first two Eyes: DotsDoConnects™ and Aftermaths™ connect you with the past and how you got to where you are today. Quadrantic Cognitions™ and The WYLIWYG® Principle, the 4th and 5th Eye respectively, connect you with where and how you are going to go from this moment on — into your future.

There has to be something that links the two parts together. Simply put here, it’s the understanding of how you are influenced and coming to terms with today’s reality and, possibly making a shift, or paradigm shift as many call it. You can buy all those books, see countless personal growth gurus, and spend thousands of dollars on improving your “self” yet, if you don’t understand clearly, honestly and accountably how you yourself tick, then you will struggle to truly and firmly move forward the way you want to.

In my second solo book, *Human Mechatronics and The Double-Edged Power of Influence* found here on this website, I try to open up and expand minds as to how we humans have been influenced through the ages. This first book in my future series under the Human Mechatronics, umbrella, discusses how humans have adapted within the World Order and within their own Living Order, especially when the Living Order relocates, a.k.a immigration. It talks about the past and current evolution of: relationships, politics, religion and even social media and celebrities. These are huge topics in themselves that I don’t dare to dive into it too deeply. The book would be thousands of pages if I did. I decided to just scratch the surface with one-hundred and twenty pages.

The book also discusses in detail, *Psychological Scotoma*. Scotoma is an ocular term and in general means, a blind spot in your vision. *Psychological Scotoma* refers to a blind spot to reality. It means, “The mind will believe what the mind wants to believe.” This phrase right here, understanding it as it pertains to your “self,” is critical in living in an ethical, productive and positive way. Coming to terms with this, after going thorough the process provided here, provides a path to making it easier for you to laugh and smile, and enjoy life the best you can and want to — without any pretence. Or, are you a sheep following the blind shepherd — being drawn and consumed by the power and voice of someone else? Please answer that for yourself.

Individual Influence Level™ links together the science and five individual Eyes of Human Mechatronics by providing a tool for you to be honest with yourself. An “honesty” which, sometimes scary in its’ own right, is paramount to the genuine growth and life you are seeking.
